

```
<p>This is an exam  
</body>  
</html>
```

You may also copy and paste the content of the file into the "index.html". The "index.html"

After saving the file, you can double click it to open it with your browser.

Now that we know the basic structure of an HTML page, let's try it out.

## Exercise

1. Add an HTML `<title>` tag with the text "Hello, World!"
2. Add a paragraph (`<p>` tag) to the body with the text "Hello, World!"

Correct! Click OK to move on to the next chapter.

Cancel

OK

```
<!DOCTYPE html>  
<html>  
  <head>  
  </head>  
  <body>  
    <h1>My First Page</h1>  
    <p>This is my first page.</p>  
    <hr/>  
    <p>This is the footer - all rights are reserved to me.</p>  
  </body>  
</html>
```

Correct! Click OK to move on to the next chapter.

Cancel

OK

## Exercise

1. Add an HTML `<h1>` tag with the text "I'm the most important!"
2. Add an HTML `<h2>` tag with the text "I'm less important!"
3. Add an HTML `<h6>` tag with the text "I'm the least important!"

### Exercise

This page does not have an exercise yet. You are welcome to contribute one by sending me a pull request:

<https://github.com/ronreiter/interactive-tutorials>

#### Code

```
4   </head>  
5   <body>  
6     <p>Here is a list of ordered items:</p>  
7     <ol type="1">  
8       <li>first</li>  
9       <li>second</li>  
10      <li>third</li>  
11    </ol>  
12    <p>Here is a list or unordered items:</p>  
13    <ul style="list-style-type: circle">  
14      <li>first</li>  
15      <li>second</li>  
16      <li>third</li>  
17    </ul>  
18  </body>
```

#### Output

Expected Output

Here is a list of ordered items:

1. first
2. second
3. third

Here is a list or unordered items:

- o first
- o second
- o third
